

WC 18th January 2018

This week we have been learning about addition and Frozen.

This week we have been learning how to create totals from two groups. We have also been learning how to solve number sentences using Frozen characters. We carefully counted our objects to solve the problems.

We have been thinking about who is special to us. We drew pictures of the special people in our lives and used our talk to explain why they were special.

As part of our winter topic, we have been looking closely at snowflakes. We have inspected pictures of them and observed how they are all different. We have been making snowflake pictures using wax crayons and water paint.

We have also been experimenting with glitter ice. We enjoyed holding the ice and explaining how it felt. We moved it around on the tough tray to see what happened.
